AGCL'S DIGITAL INITIATIVES

Development of Indigenous GPS-Based Vehicle & Asset Tracking System in Collaboration with Airtel

In a significant stride toward digital transformation and technological self-reliance, Assam Gas Company Limited (AGCL) has embarked on the development of an indigenous GPS-based tracking system aimed at enabling real-time monitoring of its vehicles and critical mobile assets. This innovative project, being developed in collaboration with Airtel for secure API and cloud infrastructure, represents AGCL's growing technological prowess and forward-thinking approach.

Project Overview

The project is centered on deploying GPS-enabled tracking devices in AGCL's vehicles and movable assets to facilitate continuous location tracking and improve operational oversight.

Key Features Under Development:

1. Live Location Tracking
2. Secure Data Transmission via Airtel API
3. Cloud-Based Monitoring Dashboard
4. Operational Efficiency and Security Enhancements

Strategic Importance

By choosing the indigenous path, AGCL aims to:

1. Strengthen data security and control
2. Lower long-term operational costs
3. Tailor the solution to specific company workflows
4. Reduce dependency on external vendors

AGCL'S JOURNEY TOWARD DIGITAL EXCELLENCE IS NOT JUST ABOUT TECHNOLOGY – IT IS ABOUT BUILDING A FUTURE SHAPED BY INDIAN INTELLIGENCE, INGENUITY, AND INTEGRITY.....
